

Glue Sticks

Component: EVA (Ethylene vinyl acetate copolymer) and Viscosity resin

Specification:

Appearance:	Light white semi-transparent Stick-like solid
Soft Point:	$\geq 95^{\circ}\text{C}$ (GB/T15332-1994)
Viscosity (180°C):	$10000 \pm 3000 \text{mpa}\cdot\text{s}$ (HG/T3660-1999)
Peeling strength(180°):	$\geq 50\text{N}/2.5\text{cm}$ (GB/T2790-1995)
Gluing time(25°C):	$\leq 8\text{S}$

Appearance of Properties: An environmental protection adhesive with excellent viscosity, good elasticity and cohesive force.

Use: Shoe, Toys, PC, Craftwork, Electrical Elements, and external packaging etc.

Remind:

1. Supporting glue gun (Suggested service power 60~80W)
2. Supporting reaction kettle (suggested service temperature 160~180 $^{\circ}\text{C}$)

Packing: 10kgs netto/carton.

Store in cool, dry place and away from direct sunlight.

Size: diameter 12mm, length 250mm or can be made according to customers' requirements.
